Antivenin Latrodectus Mactans

Revised: June 21, 2021.

Drug Levels and Effects

Summary of Use during Lactation

No information is available on the clinical use of antivenin *Latrodectus mactans* (black widow spider antivenin) during breastfeeding. Because it is a large protein molecule, the amount in milk is likely to be very low and absorption is unlikely because it is probably destroyed in the infant's gastrointestinal tract.

Drug Levels

Maternal Levels. Relevant published information was not found as of the revision date.

Infant Levels. Relevant published information was not found as of the revision date.

Effects in Breastfed Infants
