Avapritinib

Revised: October 19, 2020.

CASRN: 1703793-34-3

Drug Levels and Effects

Summary of Use during Lactation

No information is available on the clinical use of avapritinib during breastfeeding. Because avapritinib is 98.8% bound to plasma proteins, the amounts in milk are likely to be low. However, the manufacturer recommends avoiding breastfeeding during therapy and for 2 weeks following the final dose.
