Voclosporin

Revised: December 15, 2023.

CASRN: 515814-01-4

Drug Levels and Effects

Summary of Use during Lactation

No information is available on the excretion of voclosporin into breastmilk. Because voclosporin has a molecular weight of 1214 Da and is 97%, plasma protein bound, it is unlikely to enter breastmilk in large amounts. However, an alternate drug may be preferred, especially while nursing a newborn or preterm infant.
