

Quizartinib

Revised: November 15, 2023.

CASRN: 950769-58-1

Drug Levels and Effects

Summary of Use during Lactation

No information is available on the clinical use of quizartinib during breastfeeding. Because quizartinib is more than 99% bound to plasma proteins, the amount in milk is likely to be low. However, the manufacturer recommends that breastfeeding be discontinued during quizartinib therapy and for 1 month after the last dose.
